

Super Polish Safety data sheet

According to EG order nr. 1272/2008 art. 31

Page 1 of 4

reworked: 25.07.2019

1. Substance / preparation and company name

Details on the product

name: Super Polish

supplier: HS-Cleaner Werner Krauter GmbH
Siemensstraße 2-5, D-73037 Göppingen
Tel: 07161 / 9383-123 Telefax: 07161 / 9383-1355

Emergency information: see above

2. Composition / Details on components

Chemical characterisation:

Aqueous preparation from sauten components and auxiliary materials

Dangerous content substances:

CAS-Nr:	description	WT -%	classification	R-sentences
7664-38-2				
7664-93-9	mineral acid	<60	C	R34-35

3. Possible dangers of the preparation

Hazard description C corrosive

Special explanation of dangers causes erodes
for human and environment:

Water endangering class: 1

GHS05 headword: danger

H290 can corrosive with metal

H314 to cause heavy chemical burns and heavy and eye damaged

4. First-Aid-measures

General explanation:

After skin contact: change moistened clothes

After eye contact: wash off with water and soap

After eye contact: wash eyes for a longer time thoroughly

After swallowing: do not cause any vomiting

Consult a doctor immediately

5. **Measures for fire-fighting**

Suitable deleting means: C02, sand, deleting powder
For safety reasons:
Unsuitable deleting means: water
Endangering specially by the substance, its waste products of combustion or arising gasses:: In the fire case formation of poisonous gasses.
Special protective equipment: additional explanation:
cool down the endangered containers with jet of water.

6. **Accidental release measures**

Person drawee precautions:: Wear protective clothing
Environmental precautions:: Not letting electrolyte reach the sewage system, waters and soil.
Method of cleaning up / admission: Soak up with innered absorbent material
Disposing of contaminated material duly

7. **Handling**

Indications for secure dealing: storage in well locked packages cool and dryly
Only use in areas ventilated well
Indications for the fire and explosion protection:
Storage: No storage with alcalic materials
Demands on stocks and containers: keep containers locked

Using only containers which are allowed especially for the substance/the product.
Providing an acid-resistant floor.
Storage class: VCI: 8
Ordinance over combustibile liquids-class: none

8. **Exposure controls and personal protection**

Technical protective measures: No further details (show Point 7)

Components with limiting values-related job to be supervised:

No MAK value fixed (TRGS900):

Personal protection equipment::

General protection and hygiene notes..
Keeping away from food and drinks.
Wash hands before tracing and after end of work.
Respiratory protection: At aerosol formation
Hand protection: impermeable protective gloves
Eye shield: Safety goggles

9. Physical and chemical qualities

Form: liquid
Colour: colourless
Smell: neutral

	Value data	unit	method
Fire point::	n.a	°C	
Viscosity:	n.b	mm ² /s	
Density: by 20°C		1.35	g/cm ³
Lower Ex-limit:	n.a	Vol. %	
Upper Ex.limit:	n.a.	Vol. %	
Solubility into water:	soluble		
Condition change:			
Pourpint:	n.a	°C	
Boiling point:	>100	°C	
Steam pressure by 20°C	n.b.		mbar
PF-value data by 20°C	strong acid		

10. Stability and reactivity

Conditions to be avoided:
Substances to be avoided: base
Dangerous decomposition products: No decomposition with intended application

11. Details on toxicology

Classification is carried out according to a conventional method
Additional toxicological notes:
In the case of appropriate handling and intended use the product does not cause effects injurious to health.

Signs and symptoms:

Longer or repeated contact with the product impairs the natural skin back greasing and leads to draining the skin. Product splashes can cause provoking to the eye and reversible damage

12. Details on ecology

Endangering water class: 1 (Self classification)
Concentrate into drains, waters and soil to arrive do not leave.

13. Indication for the disposal

Product Recommendation: Not having reached the sewage system
not disposing together with domestic garbage untreatedly
Disposing normally after neutralization on /(pH) 7.
52102 organic acids
Waste key:
Uncleaned packing:
Recommendation: Empty containers have to be disposed in accordance with the official regulations

14. details on the transportation:

regulations for road

Transport only according to the transportation

(ADR), rail (RID), see (IMDG) u. Air (ICAO/IATA)
land transport ADR/RID and GGVS/GGVE
(international/national)

ADR/RID-GGVS/E Class:

8

Figure / letter:

17c

UN-number:

1805

Designation of the property contains

See ship transport IMDG / GGV-see

IMDG / GGV see-class:

8

PG 8204

EmS-Nr.:

8-08

MFAG 700

Marine pollutant

no

UN-number:

1805

Correctly technic. name

Packaging group:

III

15. Regulation

Identification to EU guidelines (Hazardous materials ordinance)

Classification letter and danger name of the product:

acidly

Danger-determining components for labeling:

Phosphoric acid

R-Set:

34/35

Chemical burn

S-Set:

24/25

Avoid eye- and skincontact

26

Contact with the eyes thoroughly rinse off with water and consult a doctor .

36/39

wear protective clothing and a face mask during the work

Special identification:

National regulations

Hazardous materials ordinance

Classification after GefStoffV:

Appendix II Nr: (only at deviation of EU classification)

Indications for the occupation restriction:

Incident regulation: n.a.

Data after the water conservation law

Water endangerment class: 1

Data to the immission control:

TA-air:

Class I: 0%

class II: 0%

class III: 0%

Super Polish Safety data sheet

According to EG order nr. 1272/2008 art. 31
